243. **O. WATER INTRUSION AND MOLD GROWTH:** Recent studies have shown that various forms of water intrusion
244. affect many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
245. leaving the home.

246. Examples of exterior moisture sources may be

- 247. • improper flashing around windows and doors,
- 248. • improper grading,
- 249. • flooding,
- 250. • roof leaks.

251. Examples of interior moisture sources may be

- 252. • plumbing leaks,
- 253. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- 254. • overflow from tubs, sinks or toilets,
- 255. • firewood stored indoors,
- 256. • humidifier use,
- 257. • inadequate venting of kitchen and bath humidity,
- 258. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- 259. • line-drying laundry indoors,
- 260. • houseplants—watering them can generate large amounts of moisture.

261. In addition to the possible structural damage water intrusion may do to the property, water intrusion may also result
262. in the growth of mold, mildew and other fungi. Mold growth may also cause structural damage to the property.
263. Therefore, it is very important to detect and remediate water intrusion problems.

264. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to
265. humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious health
266. problems, particularly in some immunocompromised individuals and people who have asthma or allergies to
267. mold.

268. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
269. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the
270. property inspected for moisture problems before entering into a purchase agreement or as a condition of your
271. purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the
272. property.

273. For additional information about water intrusion, indoor air quality, moisture or mold issues, go to the Minnesota
274. Association of REALTORS® web site at www.mnrealtor.com.

Minnesota Statute 103I.235 requires that, before signing an agreement to sell or transfer real property, Seller must disclose information in writing to Buyer about the status and location of all known wells on the property. This requirement is satisfied by delivering to Buyer either a statement by Seller that Seller does not know of any wells on the property, or a disclosure statement indicating the legal description and county, and a map showing the location of each well. In the disclosure statement Seller must indicate, for each well, whether the well is in use, not in use or sealed.

9. Unless Buyer and Seller agree to the contrary in writing, before the closing of the sale, a Seller who fails to disclose the existence or known status of a well at the time of sale, and knew or had reason to know of the existence or known status of the well, is liable to Buyer for costs relating to sealing of the well and reasonable attorneys' fees for collection of costs from Seller, if the action is commenced within six years after the date Buyer closed the purchase of the real property where the well is located.

14. Legal requirements exist relating to various aspects of location and status of wells. Buyer is advised to contact the local unit(s) of government, state agency or qualified professional which regulates wells for further information about these issues.

69. **DEFINITION:** A "well" means an excavation that is drilled, cored, bored, washed, driven, dug, jetted or otherwise
70. constructed if the excavation is intended for the location, diversion, artificial recharge or acquisition of groundwater.

71. **MINNESOTA UNIQUE WELL NUMBER:** All new wells constructed AFTER January 1, 1975, should have been
72. assigned a Minnesota unique well number by the person constructing the well. If the well was constructed after this
73. date, you should have the unique well number in your property records. If you are unable to locate your unique well
74. number and the well was constructed AFTER January 1, 1975, contact your well contractor. If no unique well number
75. is available, please indicate the depth and year of construction for each well.

76. **WELL TYPE:** Use one of the following terms to describe the well type.

77. **WATER WELL:** A water well is any type of well used to extract groundwater for private or public use. Examples
78. of water wells are: domestic wells, drive-point wells, dug wells, remedial wells and municipal wells.

79. **IRRIGATION WELL:** An irrigation well is a well used to irrigate agricultural lands. These are typically
80. large-diameter wells connected to a large pressure distribution system.

81. **MONITORING WELL:** A monitoring well is a well used to monitor groundwater contamination. The well is
82. typically used to access groundwater for the extraction of samples.

83. **DEWATERING WELL:** A dewatering well is a well used to lower groundwater levels to allow for construction
84. or use of underground spaces.

85. **INDUSTRIAL/COMMERCIAL WELL:** An industrial/commercial well is a nonpotable well used to extract
86. groundwater for any nonpotable use, including groundwater thermal exchange wells (heat pumps and heat
87. loops).

88. **WELL USE STATUS:** Indicate the use status of each well. CHECK ONLY ONE (1) BOX PER WELL.

89. **IN USE:** A well is "in use" if the well is operated on a daily, regular or seasonal basis. A well in use includes
90. a well that operates for the purpose of irrigation, fire protection or emergency pumping.

91. **NOT IN USE:** A well is "not in use" if the well does not meet the definition of "in use" above and has not been
92. sealed by a licensed well contractor.

93. **SEALED:** A well is "sealed" if a licensed contractor has completely filled a well by pumping grout material

96. into the well. A "capped" well is not a "sealed" well.

97. If the well has been sealed by someone other than a licensed well contractor or a licensed well sealing
98. contractor, check the well status as "not in use."
