**243. O. WATER INTRUSION AND MOLD GROWTH:** Recent studies have shown that various forms of water intrusion  
**244.** affect many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture  
**245.** leaving the home.

**246.** Examples of exterior moisture sources may be

- 247.** • Improper flashing around windows and doors,
- 248.** • Improper grading,
- 249.** • flooding,
- 250.** • roof leaks.

**251.** Examples of interior moisture sources may be

- 252.** • plumbing leaks,
- 253.** • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- 254.** • overflow from tubs, sinks or toilets,
- 255.** • firewood stored indoors,
- 256.** • humidifier use,
- 257.** • inadequate venting of kitchen and bath humidity,
- 258.** • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- 259.** • line-drying laundry indoors,
- 260.** • houseplants—watering them can generate large amounts of moisture.

**261.** In addition to the possible structural damage water intrusion may do to the property, water intrusion may also result  
**262.** in the growth of mold, mildew and other fungi. Mold growth may also cause structural damage to the property.  
**263.** Therefore, it is very important to detect and remediate water intrusion problems.

**264.** Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to  
**265.** humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious health  
**266.** problems, particularly in some immunocompromised individuals and people who have asthma or allergies to  
**267.** mold.

**268.** To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you  
**269.** have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the  
**270.** property inspected for moisture problems before entering into a purchase agreement or as a condition of your  
**271.** purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the  
**272.** property.

**273.** For additional information about water intrusion, indoor air quality, moisture or mold issues, go to the Minnesota  
**274.** Association of REALTORS® web site at [www.mnrealtor.com](http://www.mnrealtor.com).
